

Laboratorios Lopez Valero, has been developing production techniques of personal hygiene cosmetics toiletries destined especially for the workplace since 1980. Along side this activity it also works on a products for the cleaning and disinfection of surfaces, especially food industries and other treatments. Within the services performed, Microbiological Control of surfaces and Training are brought to the foreground.

Present day peculiarities and knowledge of one's own environment has prompted us to market a product that has been developed and extensively tested for years through many activities and circumstances. An anti-chafing ointment for use in sports, the workplace and health services, treating skin conditions such as scuffs, cracks or open sores which may occur from sports activity, chafing from clothing, accessories or orthopedic appliances or states of forced lack of mobilization such as in the case of bedridden patients.

The product developed is the **Anti-chafing ointment SANIA RZD**. The SANIA name is registered by *Laboratorios Lopez Valero SL* for international use in cosmetic production.

Those items which are usually found on the market are products used on cyclist's sheepskin culottes and leather goods which due to their drying can be harmful to the skin.

Our product is registered with the Ministry of Health for the prevention and relief from chafing and open sores.

Its composition has been designed to produce the following characteristics:

- * Very high performance
- * Immediate relief from the discomfort caused by chafing
- * Effective in preventing the development of such injuries.
- * Safe and natural ingredients ensure product is hypoallergenic.

Among others, it contains lanolin, glycerin, aloe extracts, sage, juniper, lavender, thyme, olive oils and minerals, menthol and allantoin.

Presentation and formats.

The chosen formats were:

200 ml jar

100 ml jar

10 ml jar (promo sample)

We've developed a display box with multiple contents:

Box of 8 x 200ml jars (Extra Large box).

Includes 9 x10 ml promo samples.

Box of 18 x 100 ml jars (Medium box).

Includes 9 x10 ml promo samples.

Box of 4 x 200 ml and 9 x 100 ml jars (Hybrid box).
Includes 9 x 10 ml promo samples.

The 200 ml and 100 ml jars can be displayed within their own box for optimal presentation purposes.

Box of 48 x 10 ml jars (promotional packaging) (Extra Small box)

Promotional samples are packaged inside individual “self-closing” bags with a slip / prospectus which include printed ingredients, directions for use, and other information required in conforming to local, state and European health laws.

Promotional packaging can also be customized with print on one side of the slip / prospectus, customer logo and information on request. Check supply minimum in order to be eligible for customized samples.

The "b" side of the slip is always printed with product data.
